

**SPENCER SHELL**

## Universal basket stretcher

The Spencer basket stretcher Shell, has been studied to confront the most difficult of emergency situations. It is ideal for rescue operations in mines, at altitude and in water. Thanks to its robust form, resistance and flexibility of use, it is indispensable anytime that a reliable and safe stretcher is needed. A revolutionary technique has been used in its realization which ensures uniform thickness of the entire length of the stretcher. The shell is in high-density polyethylene and is joined to an aluminum framework that aims to consolidate its strength. The handles for transport, which are part of the structure itself, are placed along the entire perimeter. Inside the shell there is a removable mattress, applied with Velcro®, made in closed-cell EPDM, which makes it impermeable to both blood and water. The use of high-density polyethylene for this shell guarantees not only that it is shatterproof but also an exceptional sanitization. The Spencer Shell can hold a spine board.

Comes with

- nylon rope along entire perimeter
- three 50 mm nylon belts with quick-release buckles
- water resistant, closed-cell mattress
- footrest in pre-formed polyethylene with position regulator

**TECHNICAL DATA**

Frame	Aluminum
Body material	HDPE
Length	2140 mm
Width	660 mm
Height	200 mm
Handles	12
Load capacity	280 kg
Weight	13,5 kg

ST04000A

SHELL ORANGE
